

JACINTA FIDOW (Right)

Jacinta was raised to believe that a good education combined with a strong work ethic would afford her a comfortable lifestyle. After years as a Corporate Trainer and a Project Manager, Jacinta found she had traded all her time for money, and the money she was earning could not provide all she wanted for her family. Even if it could, she had no available time to spend with her family.

Jacinta knew that she couldn't work any harder than she was already, or work more hours - she needed to work smarter. Jacinta discovered ACN through a family member who invited her and her sister along to a home presentation. Despite having no prior network marketing experience or experience in owning a traditional business, Jacinta and her sister Genevieve, both recognised the opportunity as an answer to prayer because they were looking for an opportunity that could help their family financially, and they got started immediately in December 2006.

One of their dreams was to buy a new home for their mother who had raised her 4 daughters on her own after their father passed away. They were able to realise this dream six months after they started with ACN.

Genevieve and Jacinta reached the position of Team Co-ordinator after 18-months and look forward to helping others realise their dreams. "ACN is a vehicle that has blessed us and our family in so many ways. We are very excited to share this same opportunity with others so that they too may be blessed. The future is looking extremely bright!"
